

To whom it may concern,
I am an XM Satellite radio subscriber and I just wanted to express my thoughts on an issue regarding the National Association of Broadcasters attempts to stop XM from broadcasting it's weather and traffic feeds. As a paying customer of this service, I don't believe the NAB should be trying to stop something that I am paying for. This is a good service and I'm sure a lot of people depend on it. So, I am asking you to please oppose HR 4026 and let XM continue to broadcast this wonderful service.

Thank you,

Ian
